since the third workshop on laser interaction and related plasma phenomena in 1973 one area within the scope of this conference received increased attention laser fusion this possibility was emphasized in february 1977 in a seminar on us energy policies at the hartford graduate center by john f o leary head of the federal energy administration who said that by the year 2100 laser fusion will be coming along giving us a new age of choice efforts in research and development were stepped up to investigate new concepts of laser ignition of controlled nuclear reactions here one expects no radioactive waste from fuel the deuterium tritium reaction the only one which may be possible with magnetic field confinement in tokamaks has a highly radioactive tritium cycle while in principle laser reactions are possible with pure deuterium hydrogen boron or others the worldwide progress in laser compression was not only stimulated by the energy crisis but also by its advancements in our first workshop in 1969 f floux of the french limeil laboratories described his experiments which led only one month later to the production of fusion neutrons in such large numbers as had not been achieved up to then see appendix of vol i these proceedings

radioactive sealed sources are used for a wide range of applications for industrial medical and research purposes this publication sets out the findings of a coordinated research project to examine procedures and methods for the fabrication and quality control of sealed sources based on iodine 125 palladium 103 iridium 192 and ytterbium 169 and involving experts from belarus china hungary india iran kazakhstan republic of korea peru poland and the russian federation
